Senior High School, Science, Technology, Engineering, and Mathematics (STEM) Strand *2021 – 2023*
With Honors, AY 2021–2022 | Graduated with Honors, AY 2022–2023

PROJECT EXPERIENCE

StaerySkyPH — E-Commerce Website
Web Developer | Solo Project

- Designed and developed an e-commerce website for StaerySkyPH, a small online business specializing in K-pop merchandise that I have personally operated since 2019, in order to establish a dedicated online storefront and present the brand's full product catalogue to customers.
- Built out core storefront functionality, including dedicated product detail pages, a shop/product listing page, a shopping cart, and a customer account sign-up and registration flow, along with an About page introducing the business.
- Structured the site's pages and navigation using HTML and CSS, applying responsive layout techniques so that product listings, images, and cart information display clearly and consistently across desktop and mobile screen sizes.

SSPH Shop Portfolio — Business Website
Web Developer | Solo Project

- Developed a dedicated portfolio and service website for a personal shopping and package-forwarding business offering purchase assistance for items from Korea, Japan, and Thailand, along with shipping and package consolidation services.
- Designed a clear service overview section explaining the business's offerings, along with a customer request submission form that allows prospective clients to describe the items or services they need directly through the site.
- Built a private administration page for reviewing and managing incoming customer inquiries, allowing requests submitted through the public-facing form to be tracked and followed up on efficiently.
- Developed the website using HTML and CSS, with AI assistance, while independently handling the overall site structure, content, and functional requirements.

CapsiCAM — Chili Pepper Leaf Disease Classification Mobile Application
Research and Data Coordinator | Undergraduate Group Thesis

- Contributed to an Android mobile application developed for our undergraduate thesis that classifies images of chili pepper leaves into three categories — Healthy, Bacterial Leaf Spot, or Cercospora Leaf Spot — to support early detection of chili pepper leaves diseases.
- The application performs predictions, displays visual heatmaps alongside each classification result to indicate the regions of the leaf that informed the prediction, and allows users to save and revisit previous scans through a scan history feature.

- Served as Research and Data Coordinator for the project, taking primary responsibility for sourcing and organizing the chili pepper leaf image dataset used to support the application's classification task.

HAUlam — Campus Food Discovery Mobile Application
UI/UX Development | Group Project

- Contributed to the user interface and user experience design of a mobile application that helps Holy Angel University students discover food stalls and dishes available on campus.
- The application also features account sign-in and real-time stall information powered by Supabase, supporting an up-to-date and personalized browsing experience for students.
- Collaborated with team members to ensure screen designs were intuitive and consistent with the overall navigation flow of the application, from initial exploration through to bookmarking and revisiting saved items.

LEADERSHIP & ORGANIZATIONAL EXPERIENCE

AWS Learning Club – HAU Angeles City, Philippines
Vice Chief Finance Officer *June 2025 – June 2026*

- Oversee the organization's financial records, budgeting process, and financial reporting to ensure accurate and transparent financial management across the club's activities.
- Analyze financial data to support budget planning and resource allocation decisions, working closely with fellow officers to align spending with the organization's priorities.

League of Outstanding Programmers (LOOP) – HAU Angeles City, Philippines
Finance Staff *June 2024 – June 2025*

- Assisted with recording financial transactions, tracking expenses, monitoring budgets, and preparing financial documentation and reports to support the organization's day-to-day financial operations.

College Student Council - SOC – HAU Angeles City, Philippines
Finance Staff *June 2024 – June 2056*

- Assisted with financial transactions, expense tracking, and budget monitoring in support of student council activities, and helped maintain organized financial records and documentation.
